

Amendment of the pricing system

Article 18 of Law 3790 (O.J. 143A/7.8.2009) amends the Greek pricing system. According to the new law the price of a medicinal product which is manufactured, packaged or imported in Greece is based on the average of the three lowest-prices to the wholesaler among the EU countries where the product is marketed. In this price are added the import expenses and the compulsory discounts.
