

**Προτεινόμενη διατύπωση για την εξαίρεση της Ελλάδας από τις χώρες αναφοράς για τον καθορισμό των τιμών των φαρμάκων**

The prices of pharmaceutical products which are uploaded to the site of our Ministry are exclusively determined by the Greek competent authority for the products both reimbursed by the Greek health insurance and those not reimbursable. The current Greek pricing system is based on the exceptional and harsh economic, social and medical factors that are specific to Greece. The Greek Ministry of Health asks competent Authorities in other Countries not to refer to those prices in their national pricing and reimbursement decision-making process.
